Types of Hemodynamic Monitoring

Hemodynamic monitoring techniques can be broadly classified into invasive and non-invasive methods. Each has its indications, advantages, and limitations.

Invasive Hemodynamic Monitoring

Invasive methods involve inserting catheters or sensors into the bloodstream or heart chambers to obtain precise measurements.

- **Arterial Line (Arterial Catheter):** Provides continuous blood pressure monitoring and blood sampling capabilities.
- **Central Venous Catheter (CVC):** Measures central venous pressure (CVP) and allows for medication administration.
