- **Links:** The communication pathways, usually microwave frequencies, connecting earth stations and satellites.

Types of Satellite Orbits and Their Techniques

The choice of satellite orbit significantly influences the system's coverage, latency, and application suitability. Common orbit types include:

Geostationary Orbit (GEO)

- **Altitude:** Approximately 35,786 km above Earth's equator.
- **Characteristics:** Satellites appear stationary relative to the Earth's surface, providing continuous coverage over a fixed area.
