- Conditioning the clay to achieve a consistent texture
- Selecting appropriate tools for sculpting, carving, and smoothing
- Creating an armature or internal framework to support the clay structure

Design and Conceptualization

Before the modeling process begins, artists often sketch or digitally design their concept. This phase involves:

- Defining the figure's pose, proportion, and expression
- Considering the thematic elements relevant to the anniversary
- Planning the surface details and texturing requirements

A well-conceived blueprint ensures efficient workflow and artistic coherence.

Building the Base Structure

The foundation of a detailed figure is the armature—a wire or metal framework that maintains the figure's pose and stability. Key steps include:

- Constructing a skeletal framework that supports the weight of the clay
- Ensuring proper proportion and balance
- Embedding support for delicate or extended parts such as limbs or accessories

This structural step is crucial for preventing deformation during modeling and firing.

- Smoothing surfaces with fingers, sponges, or soft tools
- Creating textures to replicate skin, fabric, or other materials
- Adding surface embellishments like scars, wrinkles, or decorative elements

These finishing touches imbue the model with realism and artistic expression.

Firing, Painting, and Preservation

Depending on the clay type, the model may be baked or left unbaked. Post-sculpting processes include:

- Firing in a kiln to harden polymer or ceramic clay
- Applying paints, patinas, or varnishes for color and protection
- Mounting or displaying the figure in suitable settings

- Start with large clay masses to form the torso, limbs, and head.
- Use your fingers or sculpting tools to smooth and refine shapes.

- Create hats, wands, chains, or other thematic props.
- Attach with adhesive clay or embed parts into the main sculpture.

7. Finishing Touches and Texturing

- Use fine tools for adding textures like rips, wrinkles, or webbing.
- Smooth surfaces with brushes dipped in water or alcohol (for polymer clay).
- Add paint or embellishments for extra detail.

8. Curing or Drying

- Follow the material-specific instructions:
- Bake polymer clay in the oven at recommended temperature.
- Let air-dry clay cure naturally, avoiding direct sunlight.

9. Painting and Sealing
