What Is an Electrotec Halogen Oven?

Definition and Overview

An electrotec halogen oven is a type of countertop cooker that uses halogen light technology to generate heat. Unlike conventional ovens that rely on heating elements or microwave radiation, halogen ovens utilize a halogen bulb as the heating source, which produces infrared heat. This method allows for rapid cooking, even heat distribution, and reduced energy consumption.

How It Works

- Reflector: Directs heat evenly around the cooking chamber.
- Fan: Ensures uniform temperature distribution and prevents hot spots.
- Control panel: Allows users to set temperature, cooking time, and other functions.
- Transparent glass body: Enables users to monitor the cooking process visually.

When powered on, the halogen bulb heats up quickly, emitting infrared radiation that penetrates food, cooking it efficiently from the inside out. The built-in fan circulates hot air for even cooking, making it suitable for baking, roasting, grilling, steaming, and even frying.
