The Marking Scheme and Grading Criteria

How Was the 2004 Maths SATs Marked?

The 2004 assessment employed a detailed marking scheme designed to ensure fairness and consistency. Key features included:

- Point-based system: Each question was assigned a specific number of points based on its difficulty.
- Partial credit: For multi-step problems, partial marks could be awarded for correct methods even if the final answer was incorrect.
- Answer accuracy: Correct answers in non-calculator papers earned full marks; in calculator papers, correct computational steps contributed to the score.
- Method marks: Recognition was given for correct reasoning and proper problem-solving strategies, encouraging understanding over rote memorization.

Grading and Performance Benchmarks

While the exact grade boundaries varied annually, typical classifications included:

- Excellent (High achievement): Scores above 80%
- Satisfactory: Scores between 60-79%

- Needs Improvement: Scores below 60%

In 2004, the emphasis was on understanding and application rather than mere accuracy, promoting a deeper grasp of mathematical concepts.
