- Developing a Procurement Management Plan that aligns with the overall project plan.
- Conducting a Make-or-Buy Analysis to decide whether to produce internally or purchase externally.
- Defining Specifications and Requirements with clear scope, quality, and performance criteria.

- Estimating Cost and Schedule impacts of procurement activities.

Key considerations include:

- Volume and frequency of purchases
- Budget constraints
- Lead times and supplier availability
- Potential risks and mitigation strategies

2. Solicitation and Supplier Selection

Once needs are identified, the next step is to solicit bids or proposals from potential suppliers. This process involves:

- Preparing Request for Quotation (RFQ), Request for Proposal (RFP), or Invitation to Bid (ITB) documents.
- Distributing solicitations to qualified vendors.
- Managing inquiries and clarifications during the bidding process.
- Evaluating proposals based on criteria such as price, quality, delivery timelines, and supplier reputation.

- Closing procurement contracts after confirming completion.
- Conducting post-procurement reviews to assess supplier performance.
- Archiving procurement documentation for audit readiness.

This phase ensures financial accountability and informs future procurement decisions.
